

**BF5050030T**

This product is based on our most popular High Quality EPISTAR and SAN'AN 5050 SMD LED (3 chips in 1 led). This version offers an excellent combination of high light output with a strong colour to provide outstanding results. Available in all colours to cover most requirements. Supplied in 12V/24V DC as standard for more accurate cut lengths. Bin control for led color to ensure consistent color throughout all of your orders.

## PRODUCT FEATURE & BENEIFTS

- ◆ Always using double-layer FPCB, mounted with high quality led Chips
- ◆ Low power requirement & Energy Efficient
- ◆ High-performance FPCB & LED for extremely long life
- ◆ Available in IP20, IP54, IP65, IP67, IP68 rating
- ◆ Great design freedom thanks to flexibility and cuttability of module
- ◆ Easy mounting on many smooth surfaces thanks to self-adhesive tape at the back

# BF5050030T

### PRODUCT START/END OPTIONS

Standard

◆ The standard products are with soldered wire on both start and end section. For other options, please let us know before placing orders.

## CONNECTIONS

### 1. Linking remote and controller

Step 1: Connecting the strip and controller

Step 2: Switch off the light, after 10 seconds, switch on again.

Step 3: When the light on, short press any zone of “1” **3 times** within 3 seconds.

**Note:** The light blinks 3 times slowly means the linking is done successfully.

The remote can link several controllers in this way. Once the linking is done, the remote can control all the controllers at the same time.

**CAUTION** - If the light does not blink slowly, the linking is failed. Please switch off the light and follow the above steps again.

## CONNECTIONS

### 2. Unlinking remote and controller

Step 1: Connecting the strip and controller

Step 2: Switch off the light, after 10 seconds, switch on again.

Step 3: When the light on, short press any zone of “1” **5 times** within 3 seconds.

**Note:** -Unlinking **MUST BE** the same zone with the linking.

-The light blinks 10 times quickly means the unlinking is done successfully.

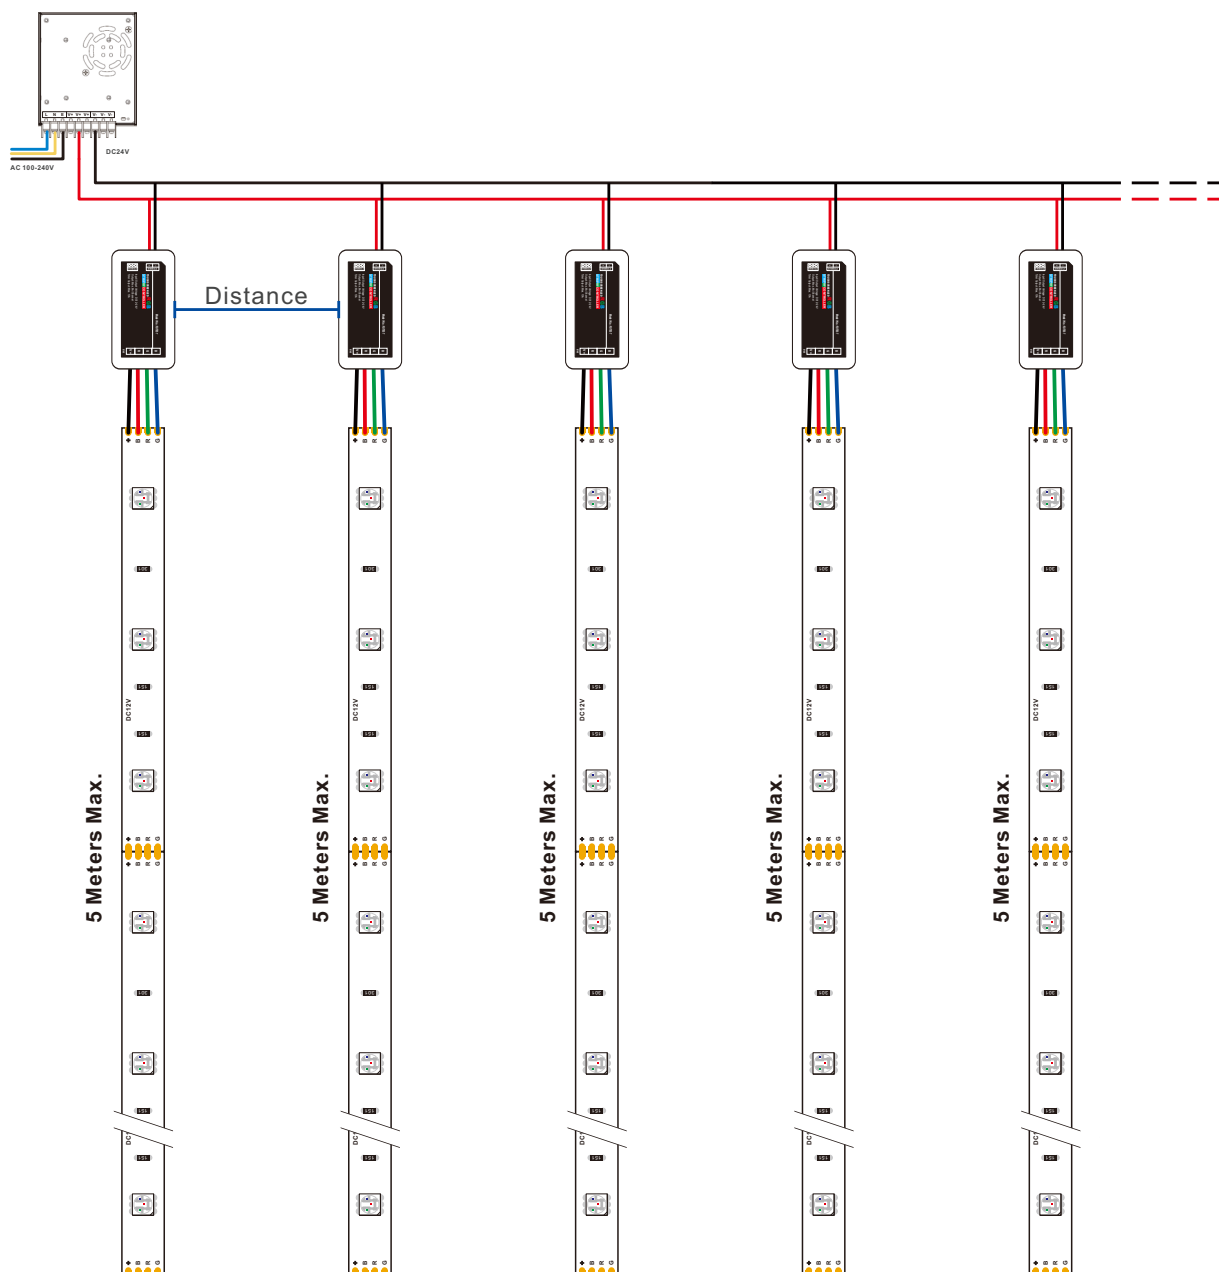

**CAUTION** - If the light does not blink quickly, the unlinking is failed. Please switch off the light and follow the above steps again.

### 3. Function of remote control

## 4. Typical configuration of connection

**ATTENTION:** The distance between controllers should be less than 20 meters, otherwise, the controller may be not able to run the same program as others.

## INSTALLATION INSTRUCTIONS

1. The mounting surface must be clean, dry and free from dust or grease.
2. Release the LED strip from the package and unreel.
3. Measure and cut the LED strip to the required length (only cut at the cut marks with power OFF).
4. Remove the 3M self-adhesive backing tape from the strip gradually during installation.  
**DO NOT** remove it all at once to avoid the strip becoming entangled and sticking to itself.
5. Stick the LED strip to the mounting surface by pressing on the strip in between components only.  
**DO NOT** press on the LEDs or other components on the strip.
6. You can use optional mounting clips to secure the strips at intervals.
7. Once the strip is affixed, it is then ready to be wired.

**CAUTION** - Twisting, pressing on LEDs, over-bending the strip, cutting at non-cut points, incorrectly powering the strip or exposing a standard strip (IP20) to water, particles or direct sunlight will invalidate the warranty.

## SAFETY

1. Installation must be in accordance with local and national electrical code regulations.
2. To ensure safety and correct installation, our strips are intended to be installed by a licensed electrician.
3. Only install with a Constant Voltage LED driver.
4. Each maximum run requires a dedicated power feed from the driver.  
**DO NOT** extend beyond the recommended maximum run length.
5. Make sure the appropriate gauge wire is installed between driver, LEDs, and any dimmers. When choosing wire, calculate voltage drop, maximum amperage rating, and the location ratings on the wire. Improper wire selection and installation could overheat wires and cause fire.
7. **DO NOT** modify product beyond instructions or warranty will be void.
